Global Change and Sustainability Center
Fall Seminar Series

"Green Infrastructure Design in Community Development"

Bo Yang

Tuesday, November 20, 2012
4:00 to 5:00 p.m.
FASB 295

Dr. Bo Yang is an Assistant Professor in the Department of Landscape Architecture and Environmental Planning at Utah State University. His areas of interest are environmental planning and technology, stormwater management, and green infrastructure design, particularly focusing at community scales. Dr. Yang has a diverse background in architecture, landscape architecture, and urban planning. He has professional experience in both China and the U.S. and has been involved in projects of different scales and focuses. Dr. Yang is currently conducting a water quality monitoring study in Daybreak community. Dr. Yang is a Research Fellow of the Landscape Architecture Foundation and Co-chair of the Design Implementation Track of the Council of Educators in Landscape Architecture.
