4:00 to 5:00 p.m.
295 FASB (Sutton Bldg.)

Cosponsored with the Program for Air Quality, Health, and Society
Abstract

Radon is a preventable cause of lung cancer. It can only be prevented if detected through a radon detection test. 30% of Utah homes have elevated levels of radon.

Bio

Dr. Wally Akerley is the Senior Director of Community Oncology Research and Professor of Medicine at Huntsman Cancer Institute at the University of Utah. As a medical oncologist, he has been active in clinical research for greater than 20 years. He actively cares for lung cancer patients and is a strong proponent for radon testing and legislation in the State of Utah.
